

## Acrylic is one of the most versatile of all thermoplastics!

Clear Acrylic Sheet was first developed in the 1930's and is one of the most commonly used and versatile plastic sheeting materials in the world today.

Acrycast is a cast sheet that is manufactured by casting liquid methyl methacrylate between two plates of glass and putting it through a curing process.

Established for over 20 years the Acrycast brand represents high quality product at a competitive price – offering you the best value for money.

“Acrylic Sheets are strong, lightweight, glass-like plastic with excellent outdoor weatherability and optical clarity.”

### ACRYCAST FEATURES:

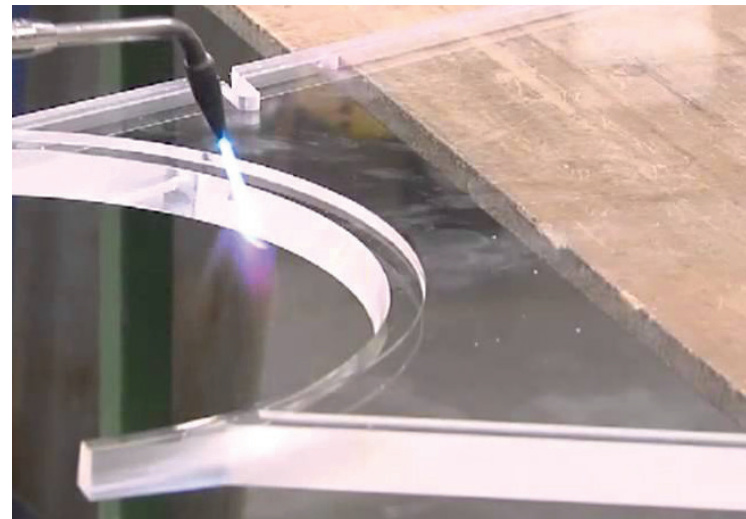

- Excellent weather resistance
- Highly transparent sheet with a light transmission of 92%
- Higher impact strength than glass
- Available in Paper or PE masking
- Easy to machine, fabricate and thermoform
- Good resistance to dilute acids and alkalis

## ACRYCAST APPLICATIONS:

- Point of Sale
- Retail / Exhibition displays
- Shop fitting / Shelving
- Framing / Model making
- Signage
- Architectural applications
- Glazing
- Parts for the medical industry
- Light fittings or roof lighting
- Screens / Partitions

## Machineable in many different ways:

Conversion | Sawing | Routing  
Laser Cutting | Fixing | Bending  
Thermoforming

Please check your local Dotmar branch for complete product range.
